

8. SDG Project Plan: Digital Literacy & Safe Internet (12 Weeks)

Goal:

To equip students with essential digital literacy skills while promoting responsible, ethical, and safe use of the internet. The project aims to build awareness about cyber safety, digital citizenship, critical thinking, and responsible online behaviour, aligned with SDG 4 (Quality Education) and SDG 9 (Industry, Innovation & Infrastructure).

Week-wise Activities and Deliverables

Week 1 – Project Launch:

Introduce the concept of digital literacy and safe internet practices. Define target groups and expected outcomes. Form student committees (Awareness, Research, Cyber Safety, Documentation) and invite initial ideas.

Week 2 – Needs Assessment:

Conduct a survey to understand students' digital usage patterns, awareness of cyber safety, and common online risks. Identify gaps in knowledge and behaviour.

Week 3 – Research & Planning:

Students research topics such as cyberbullying, privacy, digital footprint, misinformation, and safe browsing. Plan awareness campaigns and workshop themes.

Week 4 – Campaign Design:

Design IEC materials including posters, presentations, videos, and slogans on digital safety and responsible usage. Create guidelines for safe internet practices.

Week 5 – Awareness Drive (Phase 1):

Conduct classroom sessions and assemblies on digital citizenship, cyber ethics, and responsible social media use.

Week 6 – Cyber Safety Workshop:

Organize a session with an expert or trained educator on topics like online threats, password safety, phishing, and data privacy.

Week 7 – Practical Digital Skills Session:

Conduct hands-on sessions on basic digital skills such as email etiquette, online research, identifying fake news, and using educational tools safely.

Week 8 – Peer Education & Campaign:

Students lead peer sessions, create short skits or digital campaigns, and spread awareness across classes.

Week 9 – Responsible Usage & Innovation:

Encourage students to create digital content (blogs, posters, short videos) promoting safe internet practices and positive digital engagement.

Week 10 – Community Outreach:

Conduct sessions for parents on monitoring children’s digital use, cyber safety, and promoting healthy screen habits.

Week 11 – Evaluation:

Reconduct surveys to assess improvement in awareness and behaviour. Analyze changes in digital practices and understanding.

Week 12 – Presentation and Handover:

Present outcomes, student projects, and recommendations to school leadership. Submit final report, digital resources, and sustainability plan.

Key Deliverables

- Baseline and endline survey reports
- Digital literacy and cyber safety campaign materials
- Workshop plans and session reports
- Student-created digital content (videos, posters, blogs)
- Cyber safety guidelines and handbook
- Peer education programme documentation
- Parent outreach reports and feedback
- Student portfolios and reflections
- Final report with impact analysis and future recommendations
