INTRODUCTION

Sustainable development means meeting our present needs while protecting the environment and preserving resources for future generations. It teaches us to use energy and natural resources wisely, reduce waste and care for our surroundings.

Through this project, we will learn about responsible energy use, Reduce - Reuse - Recycle, environmental awareness, tree plantation and community action. We will also record our actions, experiences and reflection to understand experiences and how small changes in our daily lives can create a big positive impact on our planet.

My SDG Project

What is an SDG?

- Sustainable Development Goals are global goals that encourage people to build a healthier, fairer and more sustainable world.

Our School project mainly connects with environmental sustainability and responsible use of resources.

The SDG(s) which
our project
supports

⇒ SDG 7 - Affordable and
Clean energy

⇒ SDG 11 - Sustainable
cities and communities

SDG 12 - Responsible Consumption and
production

SDG 13 - Climate Action

SDG 15 - Life and Land

Before the project--

My Prediction

What changes do I expect this project to bring to our school / community?

I expect this project to create greater environmental awareness among students and encourage them to save electricity, reduce waste, recycle and care for trees. I hope it inspires everyone to keep our surroundings clean and green.

"If everyone takes one small step towards sustainability we can create a big change."

My Reflection on This

I feel this project will teach me how small actions can help protect our environment. I will try to be more responsible and make

sustainable choices in my

daily life 

"I may be just one voice, but my actions can inspire a thousand more".
