

Say No to Plastic Pollution

Plastic pollution is a growing problem around the world. Plastic bags, bottles, wrappers and other waste often end up on roads, in drains, rivers and oceans.

We can help reduce this problem by following the 3 R's - Reduce, Reuse and Recycle. We should reduce our use of plastic, reuse items whenever possible and send recyclable plastic for recycling.

Segregating waste is also very important. Plastic should be separated from wet waste so that it can be properly recycled. We should use cloth bags and reusable bottles instead of disposable plastic items. Every child can become an environmental protector. If we make small changes in our daily lives, we can create a cleaner and healthier planet.
